Craftland Custom Room Free-Plays. It's a nice game to start with. But when it comes to game play, there's always lagging. The data quota is still a lot and other apps worked nicely but when in game, the line goes 400, 600, 999. Is this bug or something? Even the gloo wall needs about 30 seconds to exist. Failed functionality is worse than low quality graphics! There're lots of bugs and unstable server. Bugs: 1. HUD button: placement of attack and aiming button are not same as during the game. They somehow close to middle of the screen. 2. Stuck in game: after new update, I experienced a couple of times my character just stuck at one place, unable to move, aim or attack etc but can open bag, pan around the camera view. 3. Uses too much battery and heat up device: I'm using iPhone 8. Consider it quite a better device for game requirement? Plus only playing free fire can drain this much of battery usage and heat up my phone. Like REAL HOT that it's uncomfortable to hold anymore. As soon as I quit the game, it cools down in 10 min. I don't have this issue for other similar game! 4. Too heavy graphic might cause lagging in game: happens even often after new update! Other than lower frame rate options, can we have lower quality graphic option? 5. Take up too much of storage space: This game continues to require more and more storage space in my phone, if it continues, might just consider quit the game and delete it forever for good. OR best if the game offer an option to not download some pack! hi garena i love this game a lot since the first season it has been released. i got a small request that is can u guys make the setting button on the upper right screen movable because it disturbing my gameplay a bit.
